Subject: Gold King Mine spill

Hi Amanda,

I hope you had a good trip back to CA after the conference! It was nice to see you and Elana again.

I just left you a rambling phone message letting you know that if there is any way our team here at UA Superfund can help, please let us know – either for your work with Navajo Nation, or for the folks at EPA R8 or R6, etc. Let us know if you have contacts there that we should reach out to, if you think it would be helpful – or you can pass my contact info along to them.

Our group has expertise in mining and metals contamination, could help with sampling schedules, and have capabilities for specialized analysis (such as metals speciation). One of our investigators is also Navajo with a background in hydrology, and has relationships with Navajo EPA and other groups there. She said the Navajo people are very upset about the spill.

Feel free to give me a call.

Tale care,

Sarah

Subject: RE: Thanks!

Hi all,

I echo the sentiments here – thanks all for your work on this presentation and the site generally!
The presentation and dinner were sort of my last hurrah, though I look forward to one last debrief ☺

As an update, the proposed trip I mentioned previously was postponed, so I believe my availability is pretty open. That said, there's a spill in Colorado impacting Navajo Nation and I may be called to the emergency response at any time. Maybe the latest proposed date is best?

Best,

Amanda
